❯ Summary

An enthusiastic Full-Stack Software Engineer with a passion for learning as much as possible about code to continue progressing and improving. A strong focus on writing efficient and reliable code while also producing something unique and creative. Deep understanding of CSS, HTML, and JavaScript with the ability to communicate these skills technically. Always seeking to improve coding knowledge and take opportunities to grow. Exceptional team leading and communication skills gained from prior service in the USMC.

❯ Employment

USMC — San Diego, California
LAAD Gunner — May 2013 to May 2016

Team leader for a 7212 LAAD Gunner team with multiple deployments. Maintained hundreds of thousands of dollars of military equipment. Oversaw a team tasked with protecting and fortifying a military base. Supervised and guided Marines to complete necessary training relevant to the position.

Buzzy's Pest Control — Coldspring, Texas
Pest Control Technician — June 2016 to Current

Worked with a team to identify and resolve issues relevant to pest control. Followed strict rules pertaining to chemicals and guidelines. Used management skills to assign tasks to individual team members and organized the workflow for the company.

❯ Education

Lambda Online Training Academy — Aug. 2019 to Aug. 2020

❯ Projects

Twitch Extensions — Nov. 2020 to Current

To practice and maintain my code abilities I've been building and creating extensions for the popular streaming site known as Twitch. Extensions usually consist of a frontend built with react that directly works with the Twitch API. These extensions add depth and interactivity between the streamer and the viewers.

Sound Drip (Spotify Song Suggester) – (Link to github) — Jan. 2020 to Aug. 2020

A web application connecting to Spotify's API and listing songs based on music preferences. This is done by working with a team of 10 people remotely, which includes data scientists to help produce better song suggestions.

Fitness Application – (Link to App) — Oct. 2019 to Oct. 2019

A fitness app made to calculate and track macro-nutrients.

Crypto Tracker – (Link to App) — Oct. 2019 to Oct. 2019

An application that tracks and graphs out digital currency, with an optional dark mode.
